# Subject Index of Vol. 141

Alloys
  a comparison of fatigue-crack propagation behaviour in sheet and plate aluminum–lithium alloys, 39
  effects of work hardening and heat treatment on the phase transformation behaviour of Ti–50.6at.%Ni alloys, L5
  measurements and calculations of the elastic moduli of ODS and cast Ni-based superalloys, 179
  on the $\eta'$ precipitate phase in 7050 aluminium alloy, 123
  solutal partition coefficients in nickel-based superalloy PWA-1480, 97
  structure and phase composition of $Fe_3Al$ alloy powder prepared by milling, 73
  structure and properties of rapidly solidified ultrahigh strength Al–Zn–Mg–Cu alloy produced by spray deposition, 103
Aluminium
  a comparison of fatigue-crack propagation behaviour in sheet and plate aluminum–lithium alloys, 39
  consolidation of NiAl powders using hot isostatic pressing, 79
  the effect of wire drawing speed on the dislocation cell size and yield strength in pure aluminum, L1
  on the $\eta'$ precipitate phase in 7050 aluminium alloy, 123
  structure and phase composition of $Fe_3Al$ alloy powder prepared by milling, 73
  structure and properties of rapidly solidified ultrahigh strength Al–Zn–Mg–Cu alloy produced by spray deposition, 103
  the influence of casting practice on the critical strain and subsequent grain growth of commercial purity aluminium, 229
  the mutual effects of boron, zirconium and aluminium on grain boundary segregation in $Ni_3Al$ intermetallic compounds, 169
Attrition
  structural evolution in $Nb_3Sn$ during mechanical attrition, 139
Austenite
  a flow equation and its application to the austenitic high manganese steels, 67
  martensitic transformations in cermets with a metastable austenitic binder
    I: WC–(Fe–Ni–C), 209
  strain hardening and transformation mechanism of deformation induced martensite transformation in metastable austenitic stainless steels, 189

Bainite
  mechanism of tempered bainite embrittlement in some structural steels, 221
Ball milling
  structure and phase composition of $Fe_3Al$ alloy powder prepared by milling, 73
Boron
  the mutual effects of boron, zirconium and aluminium on grain boundary segregation in $Ni_3Al$ intermetallic compounds, 169

Carbon
  martensitic transformations in cermets with a metastable austenitic binder
    I: WC–(Fe–Ni–C), 209
  the effect of interfacial reaction on thermal properties of titanium reinforced with particulate SiC, 129
Casting
  the influence of casting practice on the critical strain and subsequent grain growth of commercial purity aluminium, 229
Cermets
  martensitic transformations in cermets with a metastable austenitic binder
    I: WC–(Fe–Ni–C), 209
Chromium
  topographically close-packed precipitations and phase diagrams of Ni–Mo–Cr and Ni–Mo–Fe and of Ni–Mo–Fe with constant additions of chromium, 85
Composites
  an investigation into the degradation mode of W–$ThO_2$/FeCrAlY metal matrix composite under thermal cycling, 63
  the application of scanning laser extensometry to explore thermal cycling creep of metal matrix composites, 199
Compression
  characterization of the compression properties of rail steels at high temperatures and strain rates, 247
Copper
  analysis of {100} slip traces in ⟨111⟩-oriented copper crystals cyclically strained at room temperature, L9
  structure and properties of rapidly solidified ultrahigh strength Al–Zn–Mg–Cu alloy produced by spray deposition, 103
Crack front shapes
  microcrack propagation in fatigued f.c.c. monocrystals
    II: crack faces and crack front shapes, 49
Crack faces
  microcrack propagation in fatigued f.c.c. monocrystals
    II: crack faces and crack front shapes, 49
Crack propagation
  a comparison of fatigue-crack propagation behaviour in sheet and plate aluminum–lithium alloys, 39
  microcrack propagation in fatigued f.c.c. monocrystals
    II: crack faces and crack front shapes, 49
Creep
  fatigue-creep-environmental interaction: a kinetic approach, 55
  the application of scanning laser extensometry to explore thermal cycling creep of metal matrix composites, 199
Crystals
  analysis of {100} slip traces in ⟨111⟩-oriented copper crystals cyclically strained at room temperature, L5

© Elsevier Sequoia/Printed in The Netherlands

Deformation
strain hardening and transformation mechanism of deformation induced martensite transformation in metastable austenitic stainless steels, 189
Degradation
an investigation into the degradation mode of W-$ThO_2$/FeCrAlY metal matrix composite under thermal cycling, 63
Dislocation
the effect of wire drawing speed on the dislocation cell size and yield strength in pure aluminum, L1

Elastic moduli
measurements and calculations of the elastic moduli of ODS and cast Ni-based superalloys, 179
Embrittlement
mechanism of tempered bainite embrittlement in some structural steels, 221

Fatigue
a comparison of fatigue-crack propagation behaviour in sheet and plate aluminum–lithium alloys, 39
fatigue-creep-environmental interaction: a kinetic approach, 55
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
I: fatigue life behaviour, 1
microcrack propagation in fatigued f.c.c. monocrystals
II: crack faces and crack front shapes, 49
Flow equation
a flow equation and its application to the austenitic high manganese steels, 67
Fracture
the influence of second-phase dispersions on shear instability and fracture toughness of ultrahigh strength AISI 4340 steel, 23
Fracture toughness
the influence of second-phase dispersions on shear instability and fracture toughness of ultrahigh strength AISI 4340 steel, 23

Grain boundaries
the mutual effects of boron, zirconium and aluminium on grain boundary segregation in $Ni_3Al$ intermetallic compounds, 169
Grain growth
the influence of casting practice on the critical strain and subsequent grain growth of commercial purity aluminium, 229

Heat treatment
effects of work hardening and heat treatment on the phase transformation behaviour of Ti–50.6 at.% Ni alloys, L5
Hot isostatic pressing
consolidation of NiAl powders using hot isostatic pressing, 79

Interfaces
the effect of interfacial reaction on thermal properties of titanium reinforced with particulate SiC, 129
Iron
an investigation into the degradation mode of W-$ThO_2$/FeCrAlY metal matrix composite under thermal cycling, 63
effects of oxygen and substitutional impurities on the mechanical properties of high purity iron, 261
martensitic transformations in cermets with a metastable austenitic binder
I: WC–(Fe–Ni–C), 209
structure and phase composition of $Fe_3Al$ alloy powder prepared by milling, 73
topologically close-packed precipitations and phase diagrams of Ni–Mo–Cr and Ni–Mo–Fe and Ni–Mo–Fe with constant additions of chromium, 85

Kinetics
fatigue-creep-environmental interaction: a kinetic approach, 55

Lithium
a comparison of fatigue-crack propagation behaviour in sheet and plate aluminum–lithium alloys, 39
Low cycle fatigue
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
I: fatigue life behaviour, 1
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
II: cyclic stress–strain behaviour, 11

Magnesium
structure and properties of rapidly solidified ultrahigh strength Al–Zn–Mg–Cu alloy produced by spray deposition, 103
Manganese
a flow equation and its application to the austenitic high manganese steels, 67
Martensite
martensitic transformations in cermets with a metastable austenitic binder
I: WC–(Fe–Ni–C), 209
strain hardening and transformation mechanism of deformation induced martensite transformation in metastable austenitic stainles steels, 189
Metal matrix composites
an investigation into the degradation mode of W-$ThO_2$/FeCrAlY metal matrix composite under thermal cycling, 63
the application of scanning laser extensometry to explore thermal cycling creep of metal matrix composites, 199
Metals
defect parameters of b.c.c. metals: group-specific trends, 149
the mutual effects of boron, zirconium and aluminium on grain boundary segregation in $Ni_3Al$ intermetallic compounds, 169
Molybdenum
topologically close-packed precipitations and phase diagrams of Ni–Mo–Cr and Ni–Mo–Fe and Ni–Mo–Fe with constant additions of chromium, 85
Monocrystals
microcrack propagation in fatigued f.c.c. monocrystals
II: crack faces and crack front shapes, 49

Nickel
consolidation of NiAl powders using hot isostatic pressing, 79

effects of work hardening and heat treatment on the phase transformation behaviour of Ti–50.6at.%Ni alloys, L5
martensitic transformations in cermets with a metastable austenitic binder
I: WC–(Fe–Ni–C), 209
measurements and calculations of the elastic moduli of ODS and cast Ni-based superalloys, 179
solutal partition coefficients in nickel-based superalloy PWA-1480, 97
the mutual effects of boron, zirconium and aluminium on grain boundary segregation in $Ni_3Al$ intermetallic compounds, 169
topologically close-packed precipitations and phase diagrams of Ni–Mo–Cr and Ni–Mo–Fe and of Ni–Mo–Fe with constant additions of chromium, 85
Niobium
structural evolution in $Nb_3Sn$ during mechanical attrition, 139

Orientation
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
I: fatigue life behaviour, 1
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
II: cyclic stress–strain behaviour, 11
Oxygen
an investigation into the degradation mode of W–$ThO_2$/FeCrAlY metal matrix composite under thermal cycling, 63
effects of oxygen and substitutional impurities on the mechanical properties of high purity iron, 261

Phase composition
structure and phase composition of $Fe_3Al$ alloy powder prepared by milling, 73
Phase diagrams
topologically close-packed precipitations and phase diagrams of Ni–Mo–Cr and Ni–Mo–Fe and of Ni–Mo–Fe with constant additions of chromium, 85
Phase dispersions
the influence of second-phase dispersions on shear instability and fracture toughness of ultrahigh strength AISI 4340 steel, 23
Phase transformation
effects of work hardening and heat treatment on the phase transformation behaviour of Ti–50.6at.%Ni alloys, L5
Powders
consolidation of NiAl powders using hot isostatic pressing, 79
structure and phase composition of $Fe_3Al$ alloy powder prepared by milling, 73
Precipitates
on the $\eta'$ precipitate phase in 7050 aluminium alloy, 123

Scanning laser extensometry
the application of scanning laser extensometry to explore thermal cycling creep of metal matrix composites, 199
Shear instability
the influence of second-phase dispersions on shear instability and fracture toughness of ultrahigh strength AISI 4340 steel, 23
Silicon
the effect of interfacial reaction on thermal properties of titanium reinforced with particulate SiC, 129
Single crystals
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
I: fatigue life behaviour, 1
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
II: cyclic stress–strain behaviour, 11
Slip
analysis of {100} slip traces in ⟨111⟩-oriented copper crystals cyclically strained at room temperature, L9
Spray deposition
structure and properties of rapidly solidified ultrahigh strength Al–Zn–Mg–Cu alloy produced by spray deposition, 103
Stainless steel
strain hardening and transformation mechanism of deformation induced martensite transformation in metastable austenitic stainless steels, 189
Steel
the influence of second-phase dispersions on shear instability and fracture toughness of ultrahigh strengrth AISI 4340 steel, 23
Steels
a flow equation and its application to the austenitic high manganese steels, 67
characterization of the compression properties of rail steels at high temperatures and strain rates, 247
mechanism of tempered bainite embrittlement in some structural steels, 221
strain hardening and transformation mechanism of deformation induced martensite transformation in metastable austenitic stainless steels, 189
Strain
analysis of {100} slip traces in ⟨111⟩-oriented copper crystals cyclically strained at room temperature, L9
characterization of the compression properties of rail steels at high temperatures and strain rates, 247
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
II: cyclic stress–strain behaviour, 11
strain hardening and transformation mechanism of deformation induced martensite transformation in metastable austenitic stainless steels, 189
the influence of casting practice on the critical strain and subsequent grain growth of commercial purity aluminium, 229
Stress
influence of orientation on the low cycle fatigue of MAR-M 200 single crystals at 650 °C
II: cyclic stress–strain behaviour, 11

Tempering
mechanism of tempered bainite embrittlement in some structural steels, 221
Thermal cycling
an investigation into the degradation mode of W–$ThO_2$/FeCrAlY metal matrix composite under thermal cycling, 63
the application of scanning laser extensometry to explore thermal cycling creep of metal matrix composites, 199

Thermal properties
the effect of interfacial reaction on thermal properties of titanium reinforced with particulate SiC, 129
structural evolution in $Nb_3Sn$ during mechanical attrition, 139
Titanium
effects of work hardening and heat treatment on the phase transformation behaviour of Ti–50.6at.%Ni alloys, L5
the effect of interfacial reaction on thermal properties of titanium reinforced with particulate SiC, 129

Wire
the effect of wire drawing speed on the dislocation cell size and yield strength in pure aluminum, L1

Work hardening
effects of work hardening and heat treatment on the phase transformation behaviour of Ti–50.6at.%Ni alloys, L5

Yield strength
the effect of wire drawing speed on the dislocation cell size and yield strength in pure aluminum, L1

Zinc
structure and properties of rapidly solidified ultrahigh strength Al–Zn–Mg–Cu alloy produced by spray deposition, 103
Zirconium
the mutual effects of boron, zirconium and aluminium on grain boundary segregation in $Ni_3Al$ intermetallic compounds, 169
